

DESIGN, ENGINEERING & QUALITY: FLUXLAB™

✓ Increase Quality

✓ Maximize Lifetime

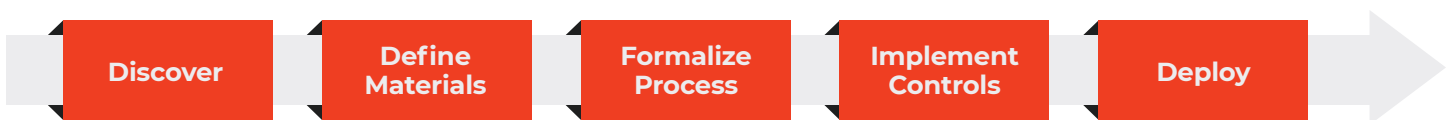

✓ Drive Value

With end to end product life cycle management built into our core, Flux becomes an extension of your engineering team. FluxLab™ offers multi-level technical engineering support to ensure customer needs are met. Whether designing a product to be deployed in the harshest of environments, reducing costs through part number rationalization, or ensuring production quality standards, FluxLab™ has you covered.

KEY CAPABILITIES

- Application Engineering
- Environmental Considerations
- Part Number Rationalization
- BOM's / Routers Development
- (NPD) New Product Development
- (NPI) New Product Introduction

OUR APPROACH

FluxLab™ follows the entire manufacturing flow including design, raw materials selection, manufacturing control points and quality testing.
