

Interconnect Assemblies

JUMPERS & WHIPS

Flux's pre-manufactured wire assemblies increase efficiencies and reduce common crimp failures associated with PV installation. Using state-of-the-art automation and built-in QC ensures that assemblies are consistent.

Benefits

- 100% factory tested
- Reduced installation time and cost
- Reduced crimp failures
- JIT reliable 98.9% On-Time Delivery
- Lean Manufacturing Partner

Custom Packaging

- **Bulk**
- **Bundled**
- **Spooled**
- **Pre-Terminated Combiner Whips**

Configurable

- Customizable Lengths
- Custom Labeling and Color Coding
- Multiple Connector Brands & Wire Gauge

*Bundled jumper assembly

Material Approvals

Technical Features

- **IP67 and IP68 rated connector types**
- **UV and ozone resistant**
- **Rated for direct burial**
- **Temperature range -40 °C to +90 °C**

Industry-Leading Quality

Flux follows a customer-approval process to consistently conform to client specifications.
